When it comes to taking an excellent photograph, did you know that the camera is far less important than the one holding it? It's true. Over these five days, you will experience how to SEE more creatively. You will use your imagination to go beyond selfies and capture truly fascinating photographs. The digital photography summer camp is a guaranteed great time, and it might just change the way you see the world around you. Digital Cameras will be provided for this camp.

9TH GRADE-ADULTS / 3 DAY CAMP

NO LIMIT ON CLASS SIZE

Thursday-Saturday, June 27-29, 2024

• 5:30-8p (Thursday and Friday)

• 9-11:30a (Saturday)

Amazing photographs happen when your heart, mind, and eye work together. Yes, the camera does play a role, but the primary ingredients are your own creativity and imagination. During these three sessions, you will be challenged to see your subjects in new ways and to make images from a fresh, new perspective. Current trends and the exciting challenges found in photography will be a part of each session. You will not just be sitting on the sidelines listening to presentations. You will be involved in projects that will help you see beyond the surface of the world around you. This camp is for photographers of any skill level. Whether you've just begun or have been using your digital camera for years, the camp will move you forward in your pursuit of finer photographs. Students are responsible for having their own digital photo-taking device (point-and-shoot, DSLR or cell phone camera).
